Target Lung Health Check Programme

Thurrock CCG Board Meeting

Update for CRG – 16 July 2019

healthwatch

Thurrock and Luton

What's happened Since May?

- We've worked with Clinical Staff at the hospital, GPs, and Business Intelligence staff to ensure a model for delivering the service is developed.
- We expect to minimise impact on existing services and CT Scanning capacity.
- We have now agreed there will be 4 sites in Thurrock where we will have scanning/screening Trucks. These are yet to be finalised but will be based in Localities. Including Grays/Purfleet/Tilbury/Corringham
- We are now working on buying the lung health trucks, with all the equipment and the team of people to operate them.
- We expect this project to start in January 2020 and run for four years.

What Materials Will We Have?

- Waiting for NHS England to supply the materials, we expect to see these next week and will share drafts with you.
- We will have a bespoke Website, like this one, but have the new criteria 55-74:

I've received an Invitation	I've already had my Lung Health Check	I've not received an Invitation	Healthcare Professionals
-----------------------------	---------------------------------------	---------------------------------	--------------------------

MOT FOR YOUR LUNGS

A new **Free NHS Lung Health Check** for people aged 55 to 80 in Leeds

We have 73 GP Surgeries involved, and we are planning to carry out health checks on up to 7,000 people.

I've received an invitation and would like to know more about Lung Health Checks

I've already had my Lung Health Check

I've not received an invitation, but would like to know more about Lung Health Checks

I am a healthcare professional

What Materials Will We Have?

We also hope to have:

- Leaflets explaining the process
- Letters inviting people to the checks, complemented by email and text where available.
- Letters informing people of the outcome of their checks.
- Support for Stop Smoking and other healthy lifestyle support
- Videos of people who have gone through an early diagnosis of lung cancer and have the 'all clear'.
