Graham Tidman

Lisa Barber

Mel Porter

Dr Ambikapathy

Tania O'Halloran

1.	<p>Welcome & Introductions / Minutes of the last meeting/ Declaration of Interest</p> <p>Len Green (LJG) welcomed everyone to the meeting and introductions were made around the room. The minutes of the previous meeting held on 16th July 2013 were agreed as a true record.</p> <p>LJG asked the committee whether anybody had any interests to declare; only Dr Bose declared an interest which was that he is a GP.</p>
2.	<p>Mental Health Strategy</p> <p>Irene Lewsey introduced herself to the room and introductions were made by the group. IL explained that she had hoped to come with options appraisals today but as they are not ready she will be discussing 3 major things that her team are doing at the moment instead.</p> <p>IL started with the Mental Health Voluntary Sector Contracts explaining that this had had clinical involvement plus provider involvement. Workshops have also been held in line with the Mental Health Strategy.</p> <p>The group were informed that an options appraisal has been carried out.</p> <p>Option 1 - Do nothing and there will be no change. It is felt that this is not really an option.</p> <p>Option 2 - Reduce the current contract value, which IL also felt is not an option.</p> <p>Option 3 - Decommission services, this is also not an option as it takes too long.</p> <p>Option 4 - Decommission services and commission a resource centre, this option is a possibility.</p> <p>Option 5 - Cease funding of building based services and commission a personal budget framework. This is the most likely option.</p> <p>The group were also informed that quality impact assessment was also carried out, and option 5 was the best quality option.</p> <p>There is work to be done in 2014/15 mapping out services and working with voluntary organisations. They have sent off a bid to be a pilot to the personal health budgets, then patients can decide where they want to go. The CCG have been asked to keep the contracts where they are for the moment to allow time to work with the voluntary organisations. IL then briefed the group on the dementia challenging behaviour pathway.</p> <p>IL went on to explain that this is all being done now due to the Francis report, Winterbourne, the Dementia Strategy, Mountnessing Court, Primary Care, blockages in A&E, people going straight from A&E to Care and Residential homes and the aging population.</p> <p>The pathway redesign work has been lead by a GP from the Castle Point and Rochford area and a psychiatrist.</p> <p>IL then explained the current pathway, the different options proposed and that it is not an option to do nothing in light of the recent reports. Focusing on inpatient redesign and focussing on pathway redesign with community investment may have funding.</p> <p>GPs have looked at the patient pathway and have expressed that they wish to have 1 phone number and propose to have a community team that can help in a crisis. If patients are discharged with a community team this will create throughput.</p>

	<p>IL stated that nothing has been decided yet and that there are still meetings to be held. She also explained that things are changing very quickly which is why there is no options appraisal. This is to be discussed with patients and carers at the beginning of October and is all information above is very sensitive and confidential until that happens.</p> <p>The group questioned whether public engagement has taken place in this project. IL explained that as this is very sensitive the clinicians need to look at this first to see what is clinically appropriate. LJG added that he had a meeting with the PMO team to find out about engagement which they are working on at the moment. They plan to raise this at the next Board.</p> <p>IL informed the group that she would be back to present again before a final decision is made at the Board meeting.</p>
3.	<p>Medication Presentation – Dr Bose</p> <p>Dr Bose introduced himself to the group and delivered a medicines management presentation.</p> <p>AB explained to the group that when registering with a GP Practice that they become a member of that practice and not a patient, until becoming ill. He then explained the definition of drugs and asked that this is remembered.</p> <p>Copies of Dr Bose’s presentation are available for anybody who wishes to view it.</p>
4.	<p>Thurrock CCG Website</p> <p>Joy Joses introduced herself as the Communications Manager for Thurrock CCG and displayed the Thurrock CCG website pages detailing what is included on each page and asked for any suggestions as she went through.</p> <p>As Healthwatch Thurrock was displayed under signposting KJ pointed out that they are not a signposting service. JJ explained that there is also a separate Healthwatch section also included on the website.</p> <p>A member of the group suggested having a voluntary group page including stroke, diabetes and the breathe easy groups.</p> <p>A suggestion was also made to have links to each practice’s website.</p> <p>LJG informed the group that Joy’s email address would be sent out with the minutes and pointed out that if anybody else had any other suggestions Joy updates the webpage daily.</p> <p style="text-align: center;">Action: Distribute Joy Joses’ email address with minutes</p>
5.	<p>Enteral Feeding Service Procurement</p> <p>Judith Harding introduced herself as the Feeding Service Dietician with the Medicines Management Team at the CSU and informed the group that she was here to deliver a presentation on the enteral feeding service procurement. Key points are outlined below.</p> <p>The enteral feeding service is out to tender. This task started 2 years ago and will establish a very good service. It is a collaborative procurement between 4 CCGs, BTUH, SUH, NELFT and SEPT. The aim is to establish an enteral feeding and nursing service for adults and children across South Essex.</p>

	<p>The proposal is to have the supplier delivering feeds, plastics and ancillaries to patients in hospitals and their own homes or usual residence. The hope is that this will achieve savings.</p> <p>JH also informed the group what the current situation is detailing that the service has never been out to formal tender before now. There are currently 520 patients across South Essex receiving feed and plastics separately; children also have a different supplier. The new proposal will save a lot of wastage as stock checks will be carried out and one supplier will deliver to all. With regards to the level of nursing, this has been written into the service specification and nurses will be able to change feeding devices in people's homes if it suits their needs.</p> <p>JH ran through the benefits for the CCG and also explained that the proposal ticks all boxes for the QIPP agenda – Quality, Innovation, Productivity and prevention.</p> <p>JH ended by letting the group know that the communications have helped in the developments of questionnaires, nurses have been involved in pump trials and the nursing homes were also involved. There has been a bidder engagement day and a public engagement day. It was also brought to the groups attention that the uplift of the service will be written into the service specification to enable it to be at the families convenience.</p>
6.	<p>Pre-Arranged AOB</p> <p>LJG updated the group on the following subjects;</p> <p>Pathology - LJG informed the group that the CCG has not taken up the Pathology proposal.</p> <p>Stroke - This subject is now going to the Board in November instead of September. They have stated that they held a period of engagement in 2012, this will be queried at Board.</p> <p>KJ asked that LJG challenges the decision made by the CCG to not have a separate stroke piece at the Board meeting with public involvement.</p> <p style="text-align: right;">Action: Challenge decision made by CCG</p>
8.	<p>Next Meeting</p> <p>Next meeting will take place on 19th November 2013 at the Beehive.</p>
